Dear Hiring Manager,

I have graduated from University of Denver with a certification in Full Web Stack Development and an emphasis in the MERN Stack. With this I have a solid understanding of MongoDB, ExpressJS, ReactJS, and NodeJS. This of course also includes an overall well-defined understanding of HTML, CSS frameworks, databases, MySQL, MVC, and JavaScript.

I also would be adding to your organization a wealth of knowledge in group collaboration. I have a robust GitHub account with over 500 commits and several group collaborations. I have been an instrumental part in several dynamic RESTful API applications.

Sincerely,
McCabe Northup
